5 CENTS A COPY

NO. 164

A PECULIAR CASE

Yesterday afternoon a man was found near the Park hotel suffering from a deranged mind, and was taken to the Park and Doctor Merkle, county physician, sent for.

Developments proved that the man had been at Walley's for treatment, had been drinking heavily, and had stepped abruptly, causing a severe nervous shock which led to the temporary mental disturbance.

He is from Tonopah and has countless friends who will care for him and who cannot understand why he was left alone while in his precarious condition. The Ormsby officials, as soon as they discovered the situation saw that the sufferer was placed where he could secure every attention, although it was not known at that time whether he was a man of wealth or simply a poor wanderer on the face of the earth.

He is better today and will no doubt be himself again in a short time.

TO INCREASE PLANT

RENO, Nevada.—From official sources it has been learned that the Truckee River General Electric company, which controls the Reno, Power, Light and Water company and all other companies generating power on the Truckee river in California and Nevada, has completed plans for the erection of two more generating plants between Reno and Floriston to supply western Nevada with light and power. The company now owns plants at Floriston, Cal., Elsie, Laughton and Reno, Nev., which have a combined capacity of 7000 horse power. The new plants will have a power amounting to 2000 and 2000 horsepower, respectively, giving the company a total of 12,000 horsepower. The increase in capacity is to be made because of the demands for power by the mining districts south and east of Reno—the Dietrich, Como, Yerington and Fairview districts. The company has already arranged to carry its line into the Yerington, Ramsey and Dietrich districts.

A contract was closed the first of this week between the Truckee River General Electric company and the Nevada Douglas Copper Mining company, the latter of this district, to extend the former company's power line from its present terminus at Colono, to the Nevada-Douglas property, about seven miles west of Yerington. Construction work on the line will begin at once and the line will probably be completed inside of ninety days, as the Douglas people do not let the grass grow under their feet when they start in to do things.

The line will be about twenty miles in length and will be of a capacity to furnish between 1500 and 2000 horse power. The cost of the line will be in the neighborhood of \$25,000 or \$30,000, and the contract runs for ten years.

The line will extend to the Blue stone mine which will be ready to use power by the time it reaches their property.—Times.

HAVE BEEN ABROAD

Rev. Carl N. Kass, and wife have returned from an extensive trip abroad. During their travels they visited most of the principal cities of England, Scotland, France, Holland and Switzerland.

Mr. Kass is the pastor of the Presbyterian church in Tonopah.

CATTLE WILL NOT MOURN

CHICAGO, Oct. 10.—Joseph H. Gidden, the inventor of the barbed wire fence, is dead at his home in De Kalb, Ill., at the age of 93.

The Girl and Good one group of mines adjoining the Tramp and Gibraltar on Bonanza Mountain, have been sold to eastern investors for \$50,000.

WILL BE TAKEN TO ELKO

The two Indians, Johnny and Iba pah, will be taken to Elko for sentence as soon as the Elko county sheriff arrives here to escort them.

AZTECS IN NEVADA

That Aztecs once inhabited the region of Central Southern Nevada and mined for the precious metals there is the belief of James W. Crutcher, who arrived in Reno yesterday from a prospecting tour of that country. He reports dwellings similar to those found in Arizona that were once inhabited by the Aztecs, mines which have probably been worked for years and from which, apparently, a great amount of gold has been extracted. The discovery was made in Desert Valley, Lincoln county, a few weeks ago by Crutcher and a party of prospectors.

Crutcher had a piece of oxidized gold, resembling a bracelet, which he discovered while chasing in the crumbling adobe walls. He carried this, with other interesting relics to Las Vegas, and when he arrived here yesterday he shipped the bracelet to the museum at Leland Stanford Junior university.

Hieroglyphs are said to exist on pieces of baked pottery, according to the statement made by Crutcher, and on the walls of the adobe village are carved grotesque characters indicative of the customs and habits of the race. He compares the discovery to the finds made in Mexico of the race which supported Montezuma before the days of Cortez.

It is probable that the students in archeology at Stanford will make a tour of this region next summer under the directions of a professor and further search for the existence of this prehistoric American race will be made.—Journal.

STORY OF ROCKY HILL DISCOVERY

The discovery of a vein of ore carrying sensational gold values is reported in the territory of the Rocky Hill Mining company in Washoe City district. The discovery is credited to an experienced Mexican prospector in the employ of the company, who, in panning on the hillside above the main workings obtained highly satisfactory gold prospects. He followed the prospect up the hill slope until, reaching a point where it gave out, and after sinking a series of holes in the vicinity of the vein from which the float gold drifted was exposed and showed such high values that one of the owners started post haste for Reno and quietly purchased all the stock held there at twenty cents, investing \$16,000 in acquiring 80,000 shares.

The news of the strike leaked out later and a stampede followed from the Riverside town. The Mexican who made the discovery pursued the same tactics as the California pocket hunters who frequently divert a car or more in panning to ascertain the source from which the float gold drifted. The Commonwealth mine in Washoe City district is making daily shipments of ore carrying zinc. This property was formerly known as the Stevenson mine and owned by the late Governor Stevenson, who worked it in a cursory way at intervals for several years, but with modern methods and reduced cost of milling is rapidly developing into a prolific and paying bullion producing mine.—Chronicle.

The local Aerie of Eagles will give a "ladies night" on next Tuesday evening. The committee in charge and out hustling and a regular "E" are out rustling and a "bird" of a time is assured those who attend.

Miss Della Monroe is visiting friends in Chico, California. She expects to remain for some time.

TO OPEN RESERVATION

WASHINGTON, October 10.—The President issued a proclamation today fixing 12 o'clock noon, October 29th as the date for opening the Walker Indian reservation in Nevada to settlement. There are 268,000 acres of land to be disposed of, and the law permits its acquisition under the general land laws. The reservation is in the Carson City land district.

DID NOT COUNT RIGHT

A postoffice has been established at Minden, the terminal of the Virginia & Truckee. Minden is a town established by the builders of the railroad in opposition to Gardnerville, located one half mile away. The new town has one inhabitant, the postmaster, who combines the duties of station agent for the V. & T. railroad.

The Journal does not know how to count correctly. W. H. Coffin, the agent and future postmaster, has a most charming wife and everybody knows that the wife of the family counts as one and the man of any household is nothing but a cipher, so, placing them side by side, that makes 10. Minden is larger than you think, brother Journal.

According to the Enterprise, Columbus Turner of Wellington and June H. Smith of Virginia City were married in Carson City, February 6, 1906. The ceremony was performed by Rev. B. H. McHenry of the Presbyterian Church.

Mrs. W. W. McMillen returned this morning from Steamboat.

Col. P. C. Hyman, at one time warden of the state prison, is a candidate for the legislature from Elko county.

COMPLIES WITH PURE FOOD LAW THAT SHOULD BE ENCOURAGED

RENO, Oct. 10.—In compliance with the pure food measure passed by congress this year, relating to the meat packing industry, the Nevada Meat company has put into effect strict rules relating to the handling of meats and the personal habits of the employees who are engaged in the big Reno institution. The rules are those adopted by the government under the provisions of the law, and are such that it will be absolutely impossible for tainted or unclean meats to be prepared or unclean habits to mark the work of the employees. Lavatories, washrooms, baths and rooms in which clothing must be changed at certain intervals are provided for the employees whose habits must be clean beyond criticism. The materials used in dressing the stock after it is killed must be kept sterilized and the dressing room free from taint. In packing meats, nothing but that which is pure and fresh can be used.

The Nevada Meat company has always been one of the most cleanly conducted in the entire country, no suspicion of carelessness ever having been lodged against it. It is now being operated under the supervision of Dr. Denby, a federal packing house inspector who was sent here by the government.

The Nevada Meat company has a branch in Carson City which complies strictly with the rules. The location of the market is opposite the capitol.

The American League team in the contest for the championship of the world defeated the National league team in Chicago yesterday by a score of 2 to 1. 35,000 people witnessed the game.

P. B. Ellis was an arrival on this morning's train.

NEVADA MEDICAL SOCIETY

Yesterday morning the first session of the Nevada Medical Society was held at Harmony Hall. Another session will be held this morning and a banquet at the Riverside Hotel to night will close the deliberations of the convention.

Many notables in the medical world were present yesterday at the convention, among whom were Dr. Thoma called the meeting to order, gave for the Southern Pacific company at San Francisco; Dr. E. A. Peters, of Colfax, and others.

Mayor Wilson delivered the address of welcome yesterday and Dr. G. H. Thoma called the meeting to order. Dr. George Fee of this city spoke on the "Advisability of Early Treatment of Diseases of the Ear." Following there was a general discussion on state medical law.

The officers of the association are as follows:

President, G. H. Thoma; first vice president, A. E. Hershiser; second vice president, S. E. D. Pluniger; secretary and treasurer, S. K. Morrison; Board of Censors—A. E. Hershiser, C. H. Woods, W. H. Wood.

Executive Committee—S. L. Lee, J. E. Cox, Arthur Hood, G. E. Hope, J. J. Sullivan.

Programme Committee—M. R. Walker, J. L. Robinson, Ernest G. Gregory, John R. Lewis.

Harry Groth is able to be out upon the streets, but he is pale and weak and recovering but slowly from his recent illness.

J. W. Proctor of Steamboat, leaves today for Oroville where he will visit his daughter. Mrs. Proctor accompanies him. He is a very sick man and his only hope is a change in altitude.

Georg Morgan, editor of the Gazette came over from Reno this morning.

CANDIDATES AT GOLDFIELD

(Special to the Appeal)
GOLDFIELD, Oct. 10.—The candidates on the state ticket are here, working like beavers, although the outlook for the ticket is so good that work is really unnecessary.

Telling speeches are made and they are received with the greatest enthusiasm. Prospects for the entire ticket were never brighter.

DANCE AT EMPIRE

R. G. Dickson will give a dance at Wiggins' Hall in Empire on the evening of October 19th. Music will be furnished by the Dempsey orchestra which is a guarantee that it will be first class. Tickets will be \$1.00, supper 50 cents. A good time is assured to those who attend.

Ministers of the Congregational church attending the convocation at San Jose have accepted the invitation of the Reno Congregational church to hold the next convention of the California and Nevada ministers at Reno next year.

WALTER CHEDIC, JR., HAS RETURNED

Walter Chedic, Jr., has returned from a visit to Oart Mills.

ROCKY HILL TRANSFER

J. S. Parker of this city, one of the original incorporators of the Rocky Hill mine, has sold out his interest in that property for \$8,000 to W. S. Wilhelm, who is president and general manager of the company. This transaction leaves the entire control of the mine in the hands of Wilhelm, H. G. Humphries and R. Rimmer.

A big strike of free milling gold ore was made at the Rocky Hill last Saturday on a nine foot ledge, which showed rich values after having been stripped for about 100 feet on the surface.

This is the largest individual sale yet recorded in the Rocky Hill records, though transactions of smaller amounts have been frequent of late.

E. G. Dickson was a visitor from Empire today.

W. B. Ligon, son in law of A. D. Grant of this city, has gone to Winder, in the Fairview district, where he will open a bank.

FINE MARBLE QUARRY

What is said to be a quarry of remarkably fine marble is being opened about three miles from Luning a new camp twenty five miles from Hawthorne. The stone is common pink, white, black and variegated and is claimed to take a big polish.

The quarry is in the Santa Fe range of mountains and it is said that it is practically a mountain of the valuable stone. Plymmer, Bros., of San Francisco have secured control of the territory where the find was made, and after conducting extensive tests, have begun opening the quarry.—Journal.

The people of Beatty have decided to hold a monster celebration in their town upon the advent of the railroad on October 22. Arrangements are already under way.

CINNABAR MINES

ROUND MOUNTAIN, Oct. 10.—There will be considerable activity in the country north and east of Round Mountain and between here and the old camp of Belmont, during the coming fall and winter.

A number of rich cinnabar properties in the Toiyama range a few miles northeast of the camp have been bought by mining men of ability and with sufficient capital to work on an extensive scale is to be started in the near future.

John W. Schulz and Charles Bad denberg, two of the principal owners of a quicksilver property near Belmont, came in from Oakland last week and in company with their superintendent, Royal Mathis, inspected their mines and talked over plans for pushing the work.

There are thirty or forty claims in the group. The metal is in the form of cinnabar in quartzite and some times assays as high as 50 per cent.

There is an abundance of water handy to the property and power could be generated from a nearby mountain stream. There is also any quantity of wood in the near vicinity.

Warden Constine of Carson City, with his associates, has secured an exceedingly rich cinnabar group, about four miles northeast of Round Mountain and plans are going forward for the active development of the property.

FOR HOLIDAY GIFTS

There are few gifts as acceptable to your friends as a book. One of the best books for children this year is Philip Verrill Mitchell's "Crystal Scepter," and those who desire to get a copy for their young friends can do so by leaving your order with Miss Annie H. Martin. In fact, she can obtain for you any of Mr. Mitchell's books and his latest story, "Little Dumpy Weaver," which immortalizes the old lumber flame near Carson City, and is said to be one of

Fine new stock of dress trimmings, lace embroideries, silkolines, cotton batts etc., just received at the little store two blocks back of the Park Hotel.
F. W. DAY.

FOUND—A stickpin, evidently made from hairpin. Prove property, pay fifty cents for this ad, and take the pin.
